Cricket Player Performance Tracking Application : CRICKSTATS

User Story:

As a Salesforce Admin, I want to create a comprehensive player performance tracking application within Salesforce to capture and analyze detailed match-by-match information of cricket players. This application will include custom objects such as Player and Match Performance with carefully defined fields and relationships to ensure data integrity and accessibility. By leveraging master-detail and lookup relationships, the application will enable robust tracking of individual and team performances, facilitate insightful reporting and analytics, and support the overall management of player statistics, thereby enhancing strategic decision-making and player development initiatives.

1. INTRODUCTION

1.1 Project Overview :

CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

It enables coaches, analysts, and administrators to record player statistics, generate reports, and support strategic decision-making.

1.2 Purpose :

The main purpose of this project is:

To digitize player performance records

To improve accuracy and accessibility of cricket statistics

To provide real-time analytics

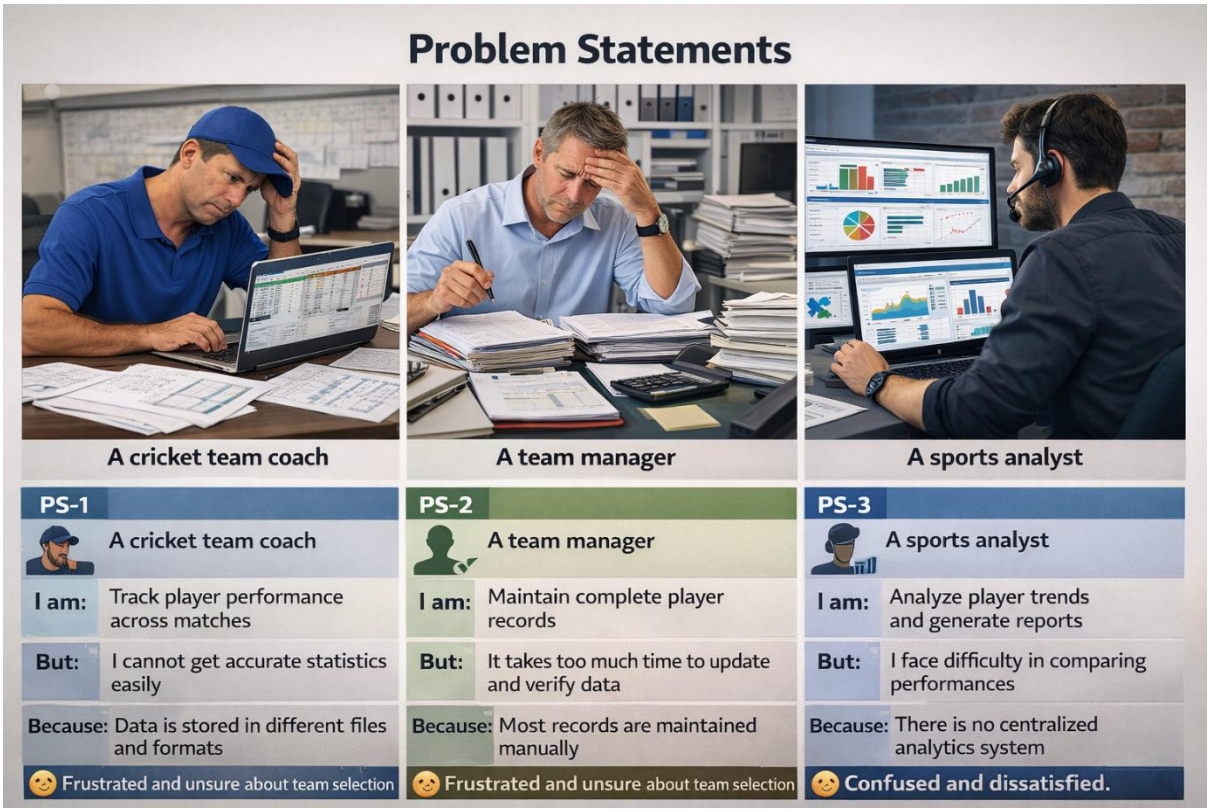

To support player development and team planning

To automate data management using Salesforce

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cricket team coach	Track player performance across matches	I cannot get accurate statistics easily	Data is stored in different files and formats	Frustrated and unsure about team selection
PS-2	A team manager	Maintain complete player records	It takes too much time to update and verify data	Most records are maintained manually	Stressed and inefficient
PS-3	A sports analyst	Analyze player trends and generate reports	I face difficulty in comparing performances	There is no centralized analytics system	Confused and dissatisfied

2.2 Empathy Map Canvas

Target Users

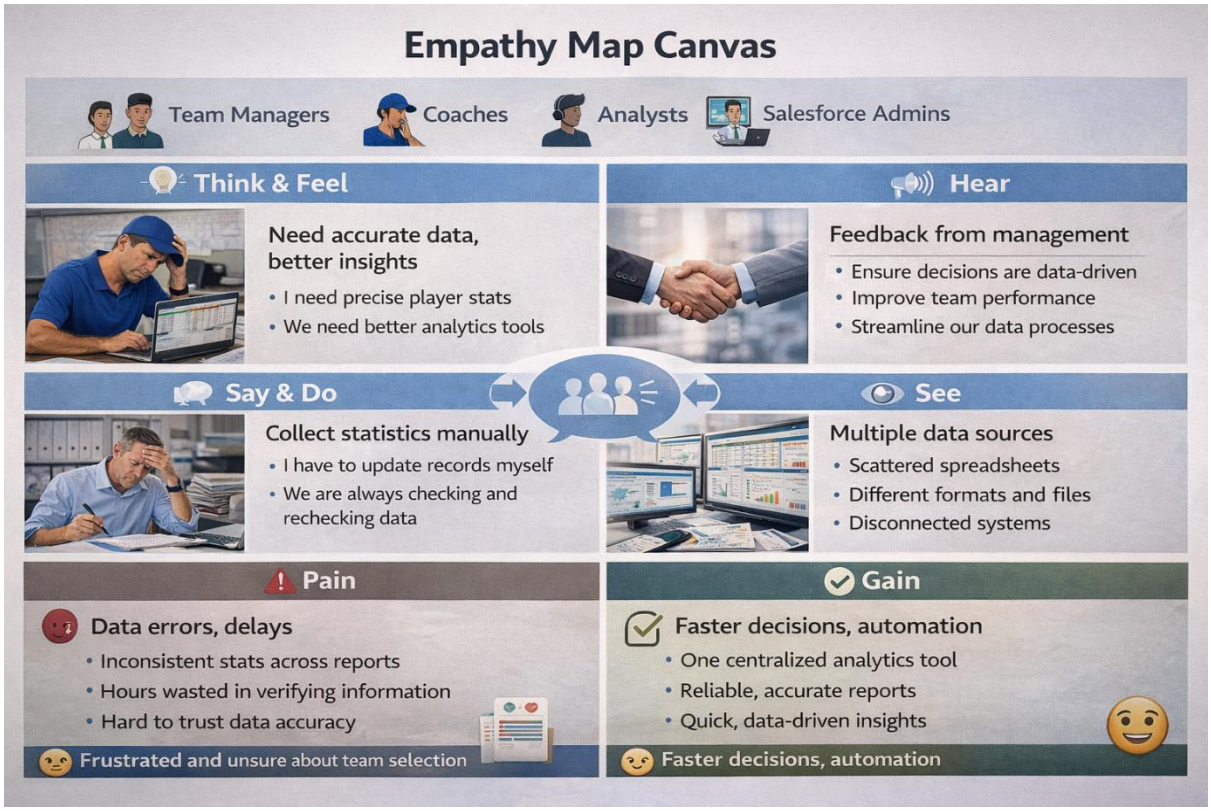

- Team Managers
- Coaches
- Analysts
- Salesforce Admins

Empathy Analysis

Aspect Description

- **Think & Feel:** Need accurate data, better insights
- **Hear:** Feedback from management

- **See:** Multiple data sources
- **Say & Do:** Collect statistics manually
- **Pain:** Data errors, delays
- **Gain:** Faster decisions, automation

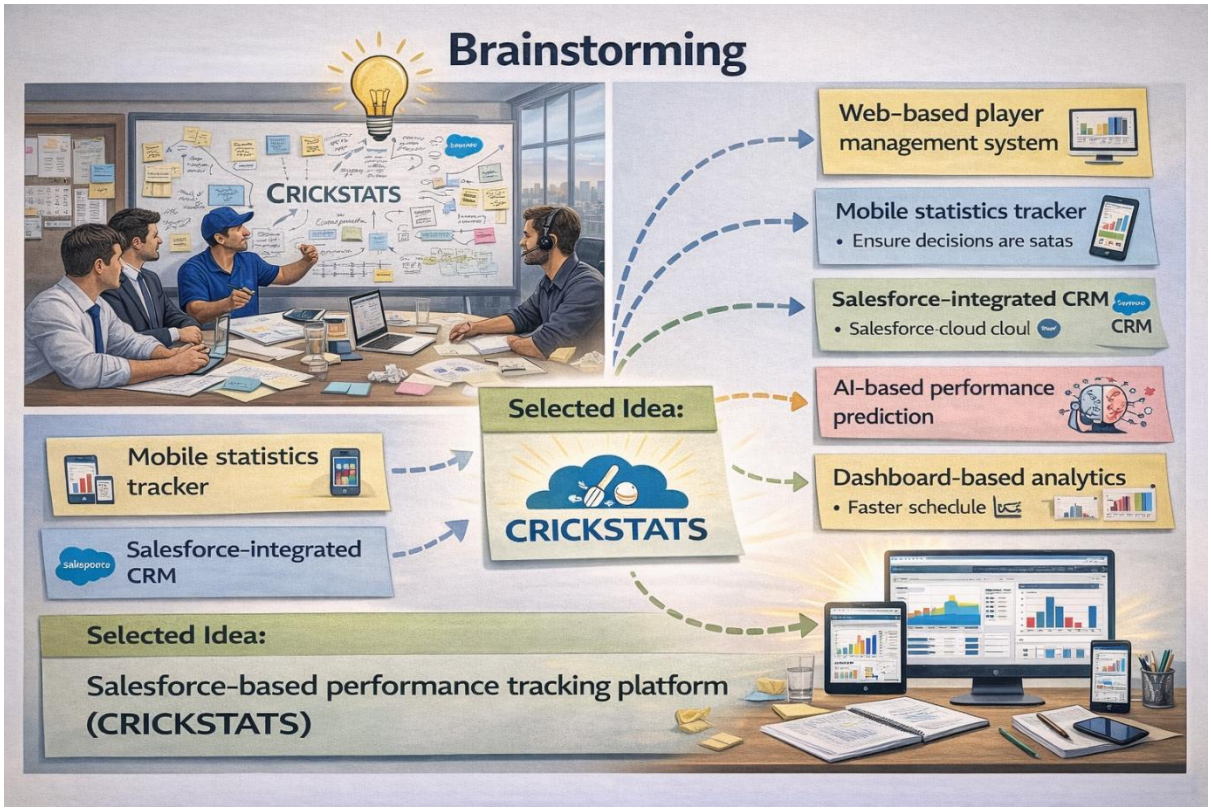

2.3 Brainstorming

Brainstormed Ideas

- Web-based player management system
- Mobile statistics tracker
- Salesforce-integrated CRM
- AI-based performance prediction
- Dashboard-based analytics

Selected Idea: Salesforce-based performance tracking platform (CRICKSTATS)

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Enter Player Data
- Record Match Performance
- Generate Reports
- Analyze Results
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry
FR-3	Dashboard Generation
FR-4	Report Creation
FR-5	Flow Automation

Non-Functional Requirements (NFRs) – CRICKSTATS

NFR-1: Usability

The system should be easy to understand and use by coaches, managers, analysts, and admins without requiring technical training.

Requirements

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-read dashboards
- Minimal learning curve

Examples:

- A new coach should be able to:
- Log in
- Enter match data
- View player reports
- within a few minutes without special training.

Example: The Salesforce Lightning interface provides drag-and-drop dashboards and user-friendly forms.

NFR-2: Security

The system must protect sensitive player data from unauthorized access.

Requirements

- Role-based access control
- Secure authentication

- Encrypted data storage
- Regular backups

.

Examples:

- Coaches can view player statistics
- Managers can edit records
- Analysts can generate reports
- Only admins can modify system settings

Example: Salesforce Profiles and Permission Sets restrict access to confidential information.

NFR-3: Reliability

The system should function correctly without failure and store data accurately.

Requirements

- No data loss
- Automatic backups
- Error handling
- System stability

Example:

If a manager enters match statistics and loses internet connection, the data should be saved automatically when reconnected.

Salesforce cloud backup ensures recovery in case of system failure.

NFR-4: Performance

The system should respond quickly and handle large volumes of data efficiently.

Requirements

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal response time

Example:

When an analyst generates a performance report for 100+ players, the report should load within 2–3 seconds.

Optimized Salesforce queries and caching improve response speed.

NFR-5: Availability

The system should be accessible whenever users need it.

Requirements

- 24/7 system availability
- Minimal downtime
- Cloud-based access
- Disaster recovery

Example:

Coaches should be able to access CRICKSTATS even during tournaments at night or on weekends.

Salesforce provides high uptime with cloud hosting.

NFR-6: Scalability

The system should support increasing numbers of users, players, and records.

Requirements

- Handle growing datasets
- Support more teams and leagues
- Expand storage capacity
- Maintain performance under load

Example:

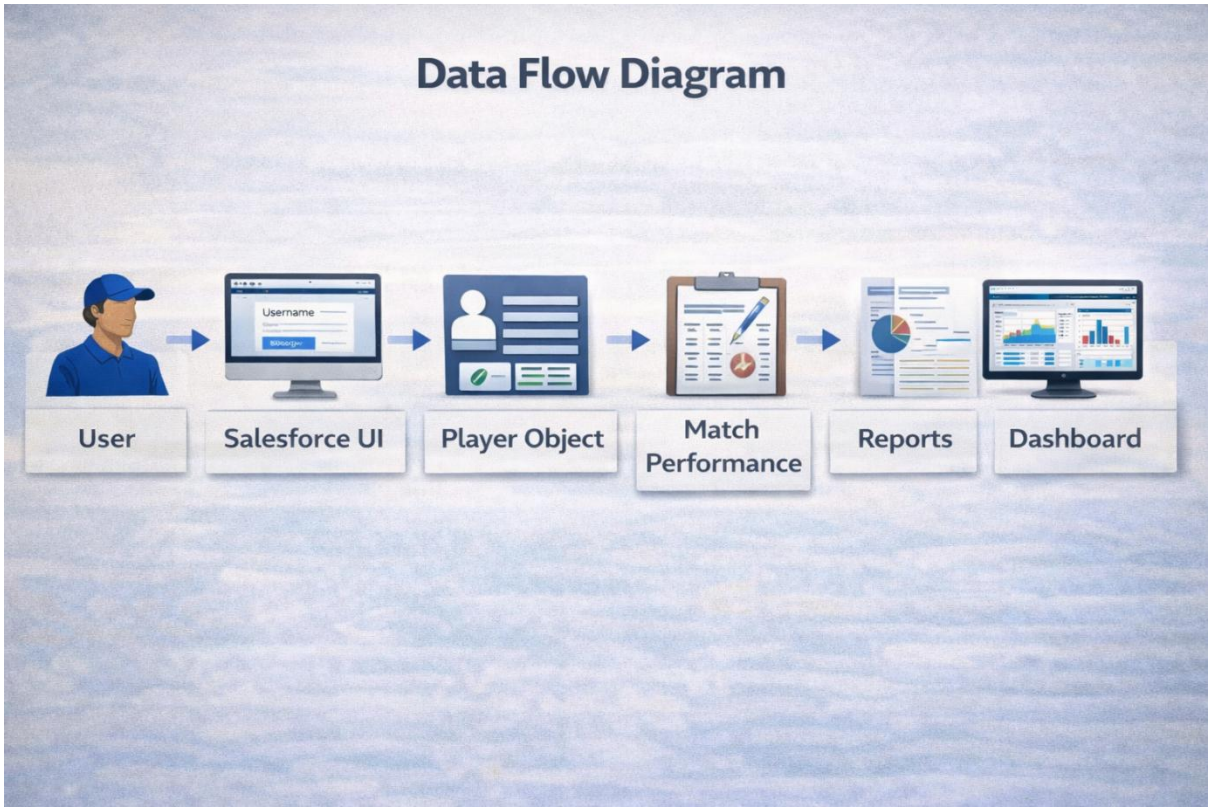

If CRICKSTATS is extended from one team to 50 teams, the system should still perform smoothly.

Salesforce cloud infrastructure automatically scales storage and processing.

3.3 Data Flow Diagram

Data Flow

User → Salesforce UI → Player Object → Match Performance → Reports → Dashboard

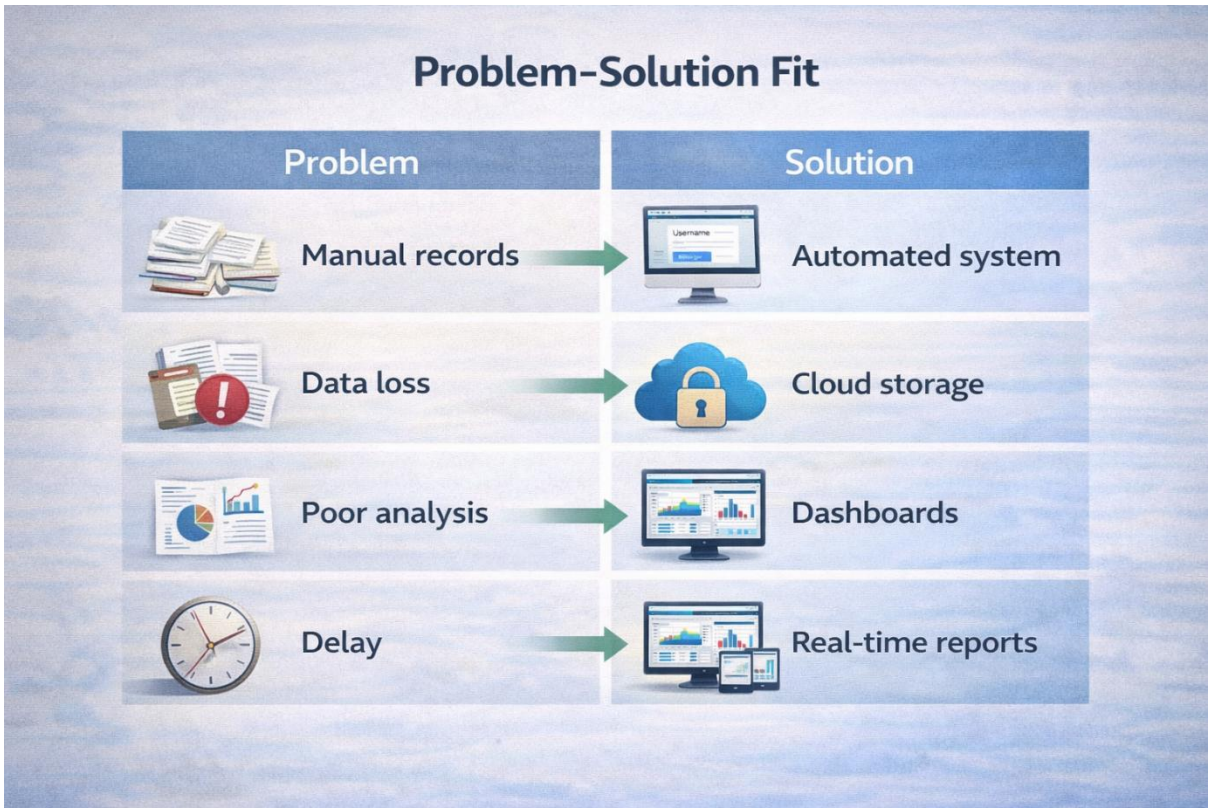

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Analytics	Reports & Dashboards
Automation	Salesforce Flows
Backend	Salesforce Objects
Database	Salesforce Cloud

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRICKSTATS system effectively addresses the key challenges faced in traditional cricket performance management. Earlier, most player and match data were maintained using manual records, which were time-consuming and prone to errors. This issue has been resolved by implementing an automated system through Salesforce, which ensures accurate and efficient data entry and management. The problem of data loss, caused by improper storage and lack of backups, is overcome by using secure cloud storage that safely stores all information and allows easy retrieval. Poor analysis of player performance, due to scattered and unorganized data, is addressed through interactive dashboards that present clear visual insights and reports. Additionally, delays in accessing performance information and generating reports are eliminated by providing real-time reporting features, enabling users to make faster and more informed decisions. Thus, CRICKSTATS successfully bridges the gap between existing problems and modern technological solutions.

4.2 Proposed Solution

Description

CRICKSTATS provides:

- Custom objects (Player, Match Performance)
- Master-detail relationships
- Roll-up summaries
- Lightning App
- Automated flows
- Interactive dashboards

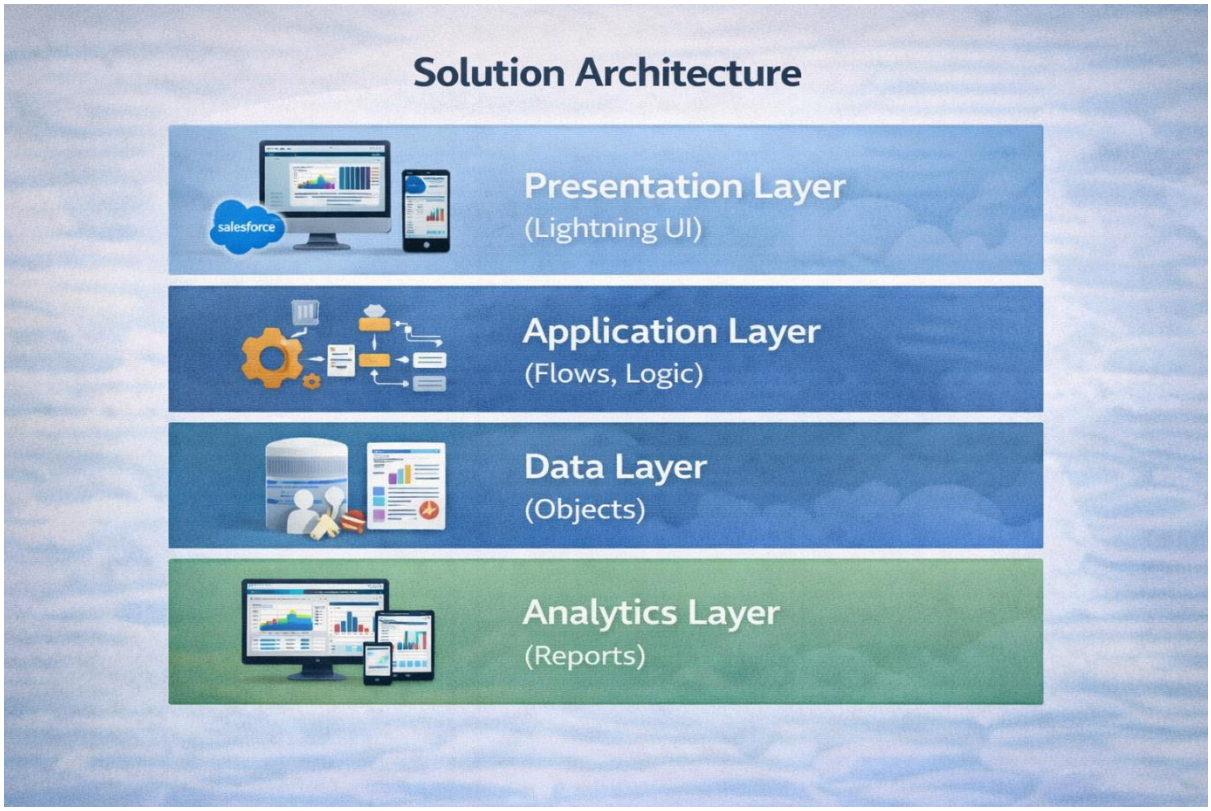

Key Features

- Centralized database
- Live statistics
- Secure access
- Scalable design
- Easy reporting

4.3 Solution Architecture

Architecture Layers

- Presentation Layer (Lightning UI)
- Application Layer (Flows, Logic)
- Data Layer (Objects)
- Analytics Layer (Reports)

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile-based execution
- Object creation → automation → reporting
- Sprint-wise development

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce	1	High	Member1

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			developer account so that I can configure and deploy the CRICKSTATS system.			
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	Member2
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	Member3
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	Member4

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	Member2
Sprint-2	Automation	USN-7	As a system, I want to validate player and match inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-8	As a system, I want automated flows to update player statistics so that performance data remains accurate.	5	High	Member1

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Fields & Relationships

Milestone 6 : Roll-up Summary

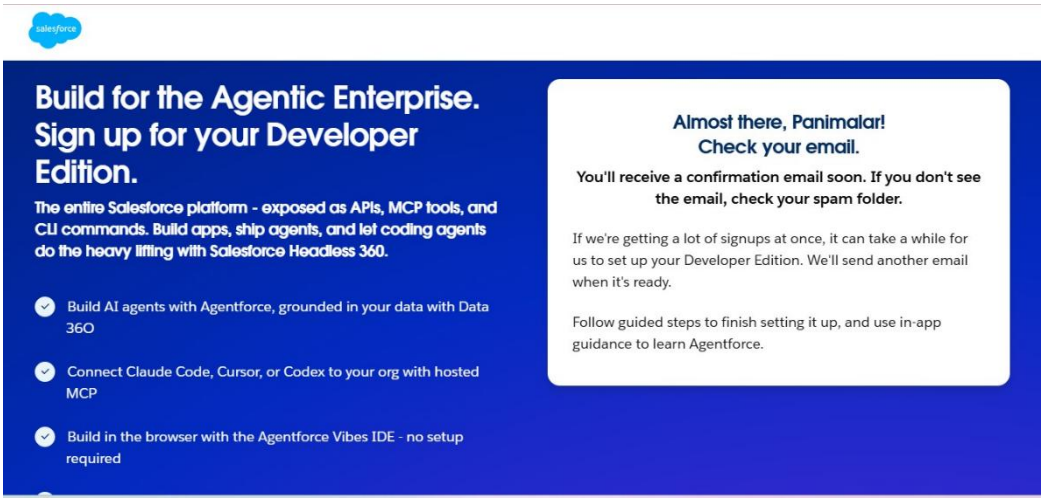

Milestone 7 : Flows

7.Implementation

Phase 1: Account Setup & Environment Preparation

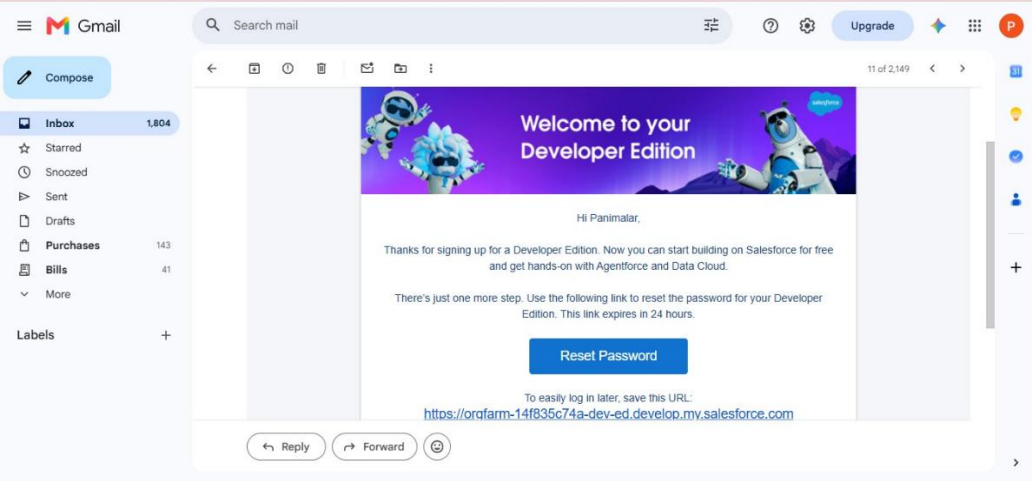

Milestone 1: Salesforce Developer Account Creation & Activation

1. **Developer Account Creation:**
    - Navigated to https://developer.salesforce.com/signup.

    - Completed the registration form with First/Last Name, Email, Role set as **Developer**, Company Name, Country (**India**), and Postal Code.
    - Defined a unique username format (username@organization.com).

2. **Account Activation:**
    - Accessed the verification email sent to the registered inbox and clicked **Verify Account**.

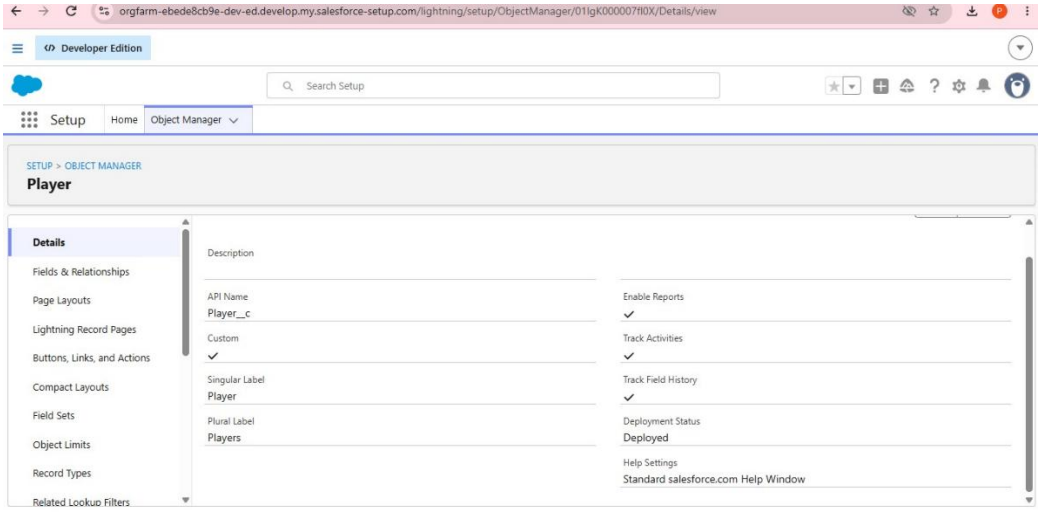

- Set up the password and security credentials to log into the Salesforce Setup environment.

Phase 2: Data Architecture & Object Creation

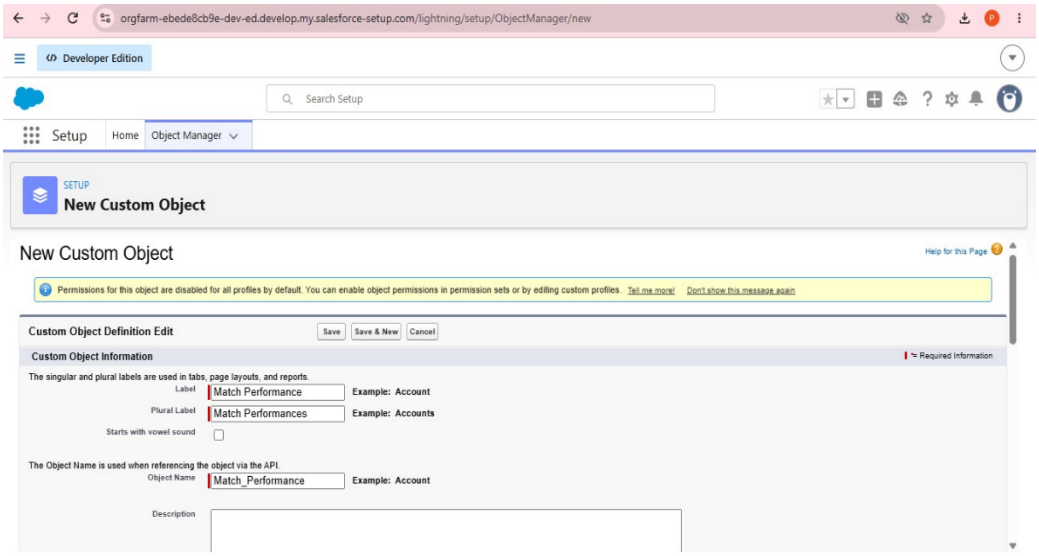

Milestone 2: Custom Objects Setup

1. **Player Object (Player__c):**
   - Navigated to **Setup →Object Manager →Create →Custom Object**.

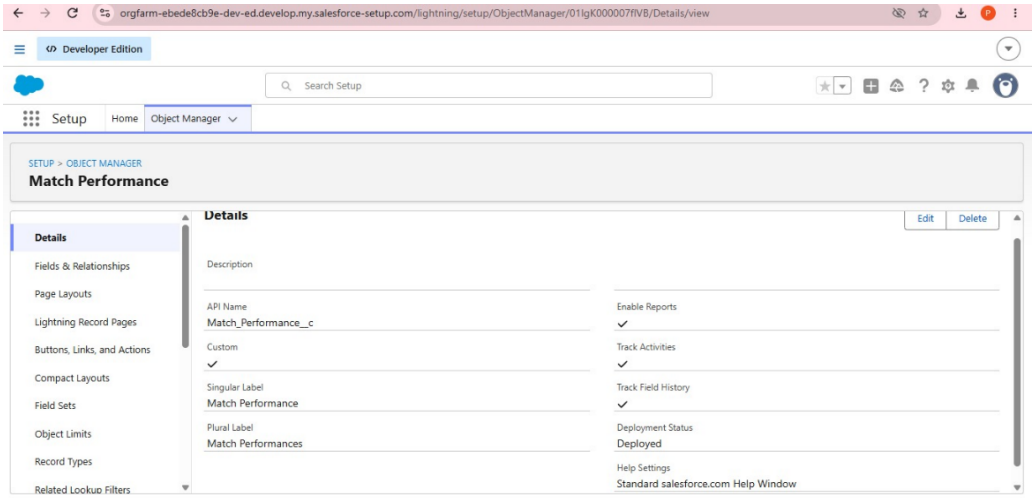

- Set Label as **Player**, Plural Label as **Players**, and Record Name as **Player Name** (Data Type: Text).
- Enabled **Allow Reports**, **Allow Activities**, **Track Field History**, and **Allow Search**.

2. **Match Performance Object (Match_Performance__c):**
   - Created a custom object with Label **Match Performance** and Plural Label **Match Performances**

   - Set Record Name as **Customer Account Name** (Data Type: Text).
   - Enabled tracking, reporting, activities, and search capabilities.

Phase 3: Application Configuration & Navigation

Milestone 3: Custom Tabs Creation

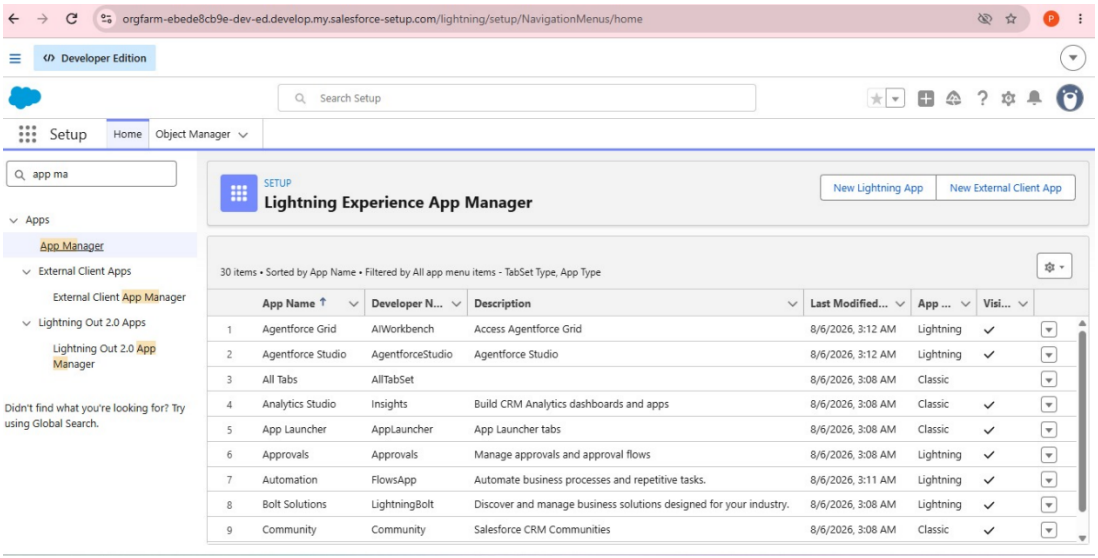

- Created custom object tabs for both **Player** and **Match Performance** via **Setup →Tabs**.

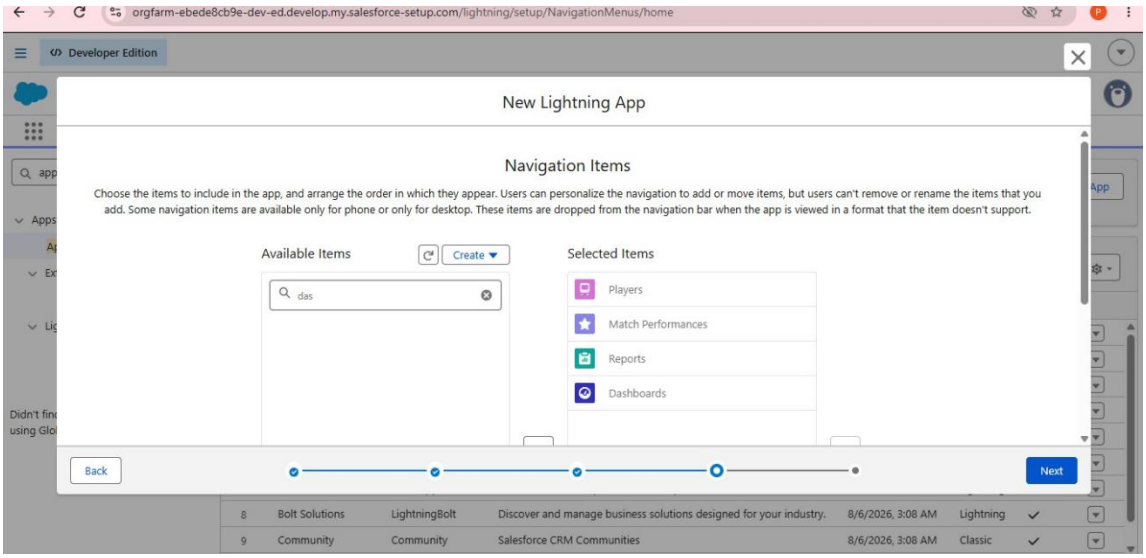

- Assigned appropriate tab styles and customized access settings across user profiles.

Milestone 4: Lightning App Development (CRICKSTATS)

- Created a new Lightning App named **CRICKSTATS** via **App Manager**.

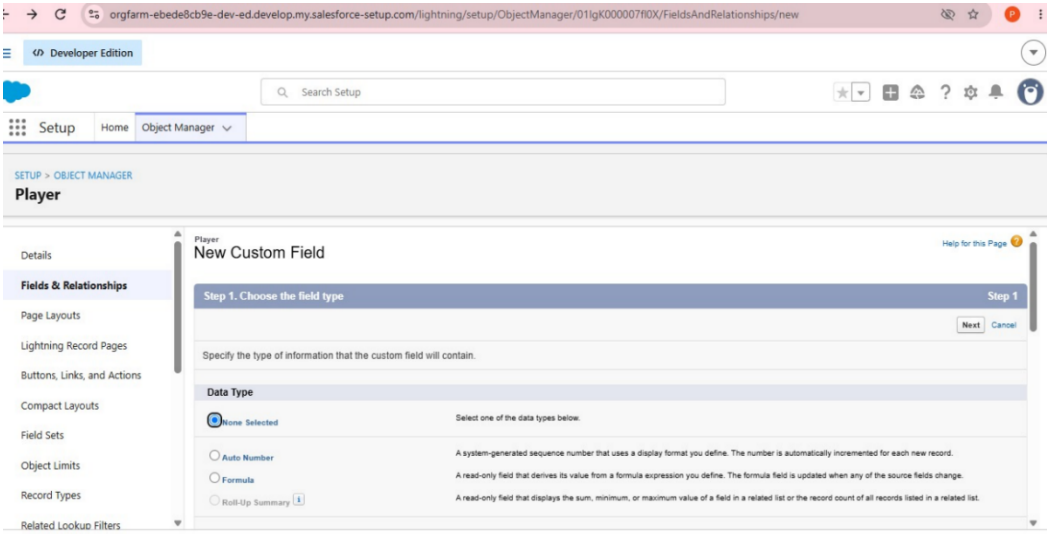

- **Configuration Settings:** Standard Navigation, Desktop & Phone support, Setup experience.
- **Navigation Items:** Included **Players**, **Match Performances**, **Reports**, and **Dashboards**.
- **User Profile Access:** Assigned access to the **System Administrator** profile.

Phase 4: Data Modeling – Fields, Relationships & Roll-ups

Milestone 5: Custom Fields Definition

1. **Fields for Player Object:**
    - **Text Fields:** Player Name (Length: 50), Player Number (Length: 3).
    - **Rich Text Area:** Profile Picture.
    - **Date:** Date of Birth.

    - **Picklists:**
        - *Role:* Batsman, Bowler, Batsman & Wicket Keeper, All Rounder.
        - *Batting Style:* Right-Handed, Left-Handed.
        - *Bowling Style:* Right-Arm Fast, Left-Arm Fast, Right-Arm Medium, Left-Arm Medium, Right-Arm Spin, Left-Arm Spin.
        - *Nationality:* List of major cricket-playing nations.

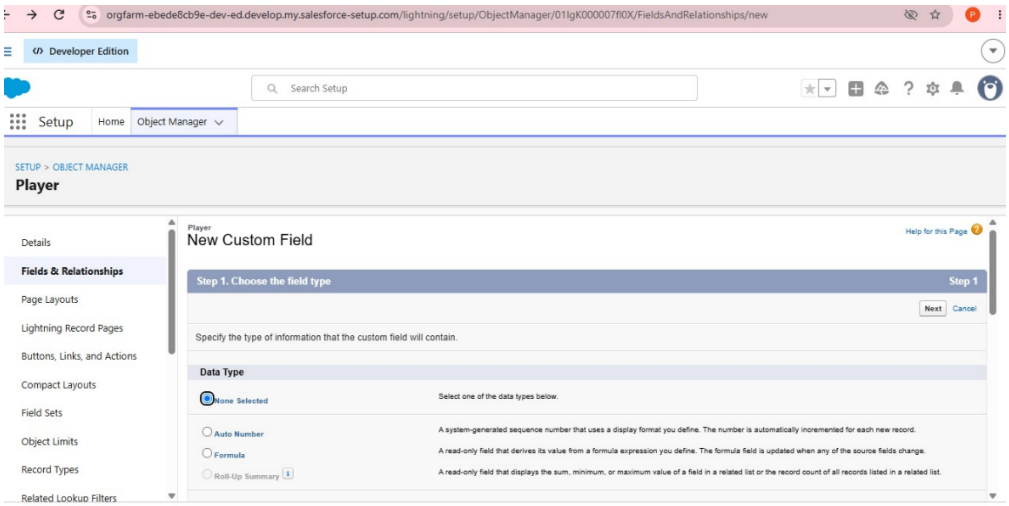

- *Team:* All 10 IPL franchises (CSK, DC, KKR, MI, PBKS, RR, RCB, SRH, GT, LSG).

- **Formula Field:** AVG Score (Return Type: Number) calculating:

$$\text{IF}\left(\text{Matches_Played__c} > 0, \frac{\text{Total_Runs__c}}{\text{Matches_Played__c}}, 0\right)$$

2. **Fields for Match Performance Object:**

   - **Text / Checkbox / Picklist:** Match Performance Name (Text, 80), Player of the Match (Checkbox), Match Result (Picklist: WON, LOST, DRAW).
   - **Numeric Fields:** Runs Scored, Balls Faced, Fours, Sixes, Overs Bowled, Wickets Taken, Runs Conceded, Maiden Overs, Stumpings, Catches.
   - **Master-Detail Relationship:** Linked **Match Performance** (Child) to **Player** (Parent).

Milestone 6: Roll-up Summary Fields on Player Object

Aggregated performance data automatically from child **Match Performance** records onto the parent **Player** record:

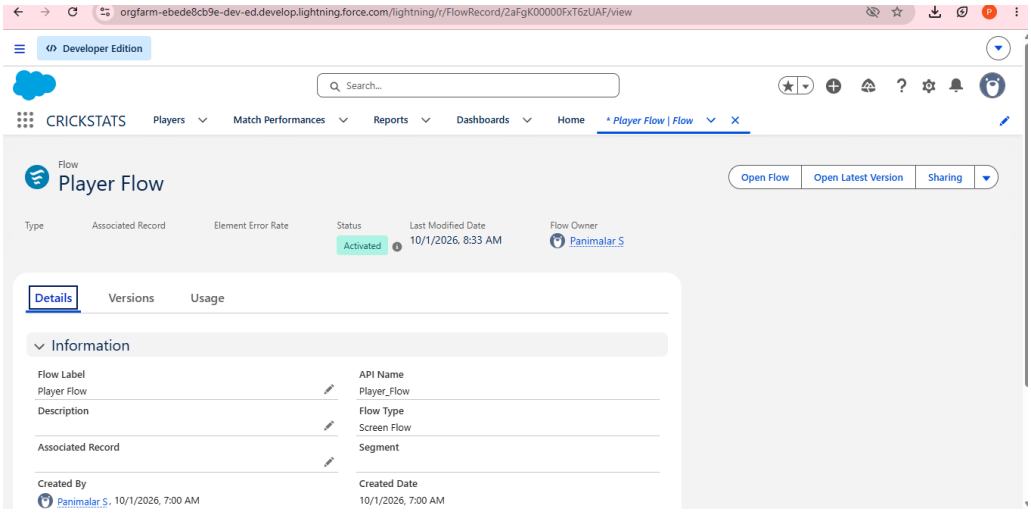

- **Matches Played:** Count of all related Match Performance records.

- **Number of 50's & 100's:** Count of records filtered by score milestones.
- **Total Aggregations (SUM):** Total 4's, Total 6's, Total Runs, Total Overs, Total Wickets, Total Stumpings, Total Catches.

Phase 5: Automation & UI Customization

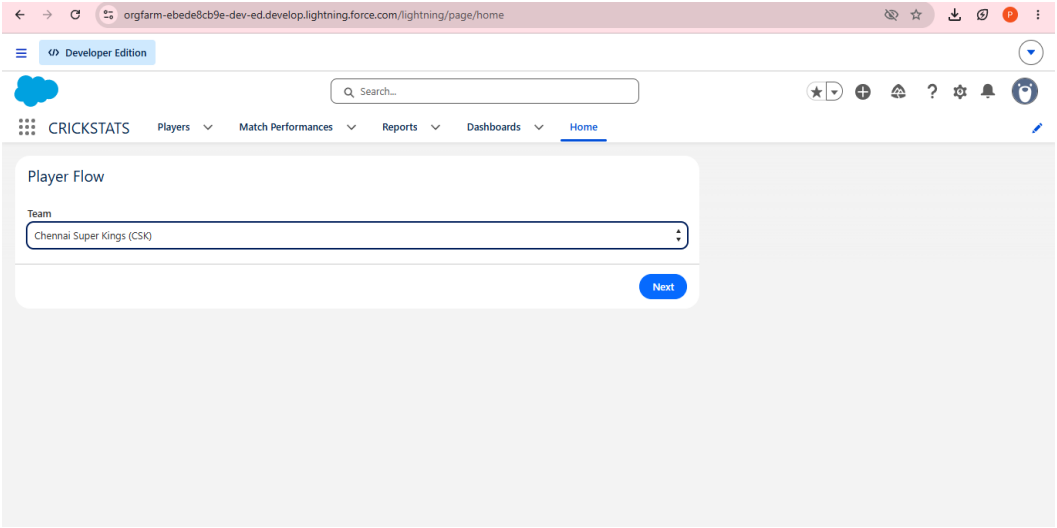

Milestone 7: Screen Flow Implementation

1. **Flow Logic Creation:**
    - Created a **Screen Flow** labeled **Player Flow** (Player_Flow).
    - **Screen Component (Players_screen):** Picklist selection for filtering by **Team** using a Picklist Choice Set.
    - **Get Records Component (Players):** Fetched Player records where Team equals the selected screen value.
    - **Data Table Component (Player_info):** Displayed retrieved player details including *Profile Picture, Player Name, Total Runs, AVG Score, Batting Style, Bowling Style, Matches Played, 50s, and 100s*.

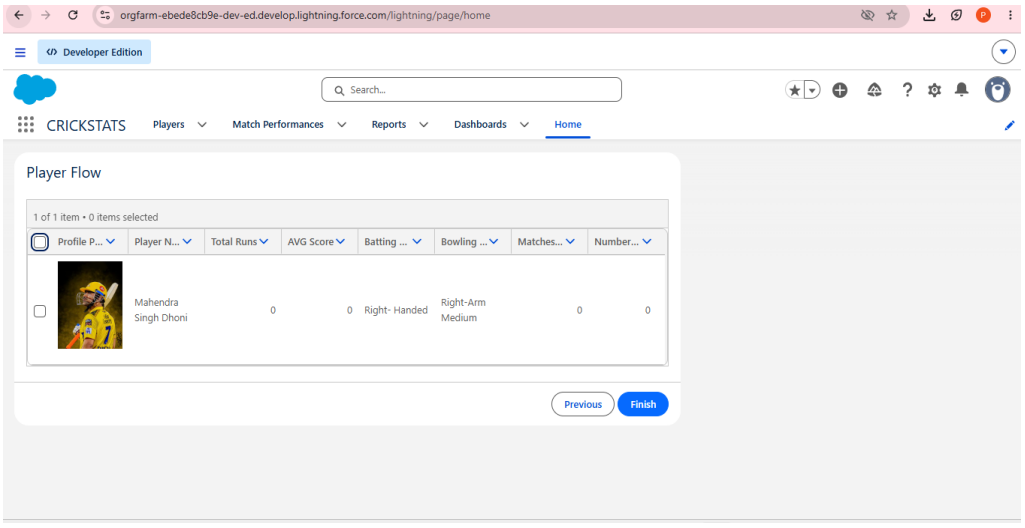

2. **Home Page Integration:**
    - Added the **Home Page** tab to the **CRICKSTATS** navigation bar.

- Customized the Home Page layout by embedding the **Player Flow** screen component.
- Activated and assigned the customized Home Page layout as the App Default for **CRICKSTATS**.

Phase 6: System Testing & Validation

- Verified custom record creation for **Players** and **Match Performances**.
- Checked automatic real-time metric updates driven by Roll-up Summaries and Formula fields.

- Tested the Screen Flow on the Home Page to confirm dynamic filtering and display of player stats based on team selection.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized system
- Real-time analytics
- Secure platform
- Scalable design
- Reduced manual work

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. CONCLUSION:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

The project demonstrates practical application of SDLC, Agile methodology, and CRM-based development.

10. FUTURE SCOPE

- Mobile application integration
- AI-based performance prediction
- Video analysis integration
- Player ranking system
- Public statistics portal
- Multi-league support

11. APPENDIX

- Salesforce Objects & Fields
- Manual match
- statistics
- FlowConfigurations

Thank You
